## DETAILED ACTION

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is not clear how the lock is mounted on the back bar (line 4) and the engagement means for engaging the lock is also mounted on the back bar (line 7). It appears that the lock is mounted on the front bar.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Paulhill, US #6,481,126.
5. Paulhill teaches a license plate locking assembly including a back bar having long first and second opposed edges (Figure 3), lock 30 mounted to the front and back bars (as best as the instant claim can be understood), and engagement means 33 on the back bar for engaging the lock. Front 21 and back 31 are slidably engageable.

### ***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 1, 2, 4 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Paulhill.

8. Paulhill does not teach apertures for fasteners on the back bar, however, this is considered to be a reversal of known parts. Paulhill teaches the apertures 26 in the front bar that are covered by tabs 32 from the back bar. It would have been obvious to a person having ordinary skill in the art at the time the invention was made to place the apertures in the back bar and cover them with the front since it has been held that a mere reversal of the essential working parts of a device involves only routine skill in the art.

### ***Conclusion***

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US patents 2661558, 1524848, 4584856 and 5983539 are cited as of interest.

### ***Allowable Subject Matter***

10. Claims 3 and 5-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3611

11. The following is a statement of reasons for the indication of allowable subject matter: A license plate lock as described in claim 1 and further including the rails comprising opposed, spaced fingers is not shown or suggested by the prior art of record.
